SURGE SUPPRESSOR LM-HW-24V-S

APPLICATION: The LM-HW-24V-S is a surge suppressor designed for 24 VDC applications in commercial and industrial process control and battery charging systems. It installs in parallel with the equipment and protects the connected devices from damaging over-voltage transients thus reducing equipment damage and downtime.

DESCRIPTION: Line-to-Line (LL) and Line-to-Ground (LG) protection circuits. Easy universal installation-small profile. Fast response time to voltage and current rise. Automatic recovery. 8" 12 AWG wire leads for universal installation. Short circuit- End of Life. Length 4", Width 2", Height 2-1/2"
