

Would You Trust the Safety of Your Site to the Lowest Bidder

LIGHTNING MASTER

- Full service, full spectrum static solutions and lightning and transient protection company, serving the oil and gas and chemical industries for almost 30 years.
- UL Listed Parts – highest quality product
- Long life, low maintenance
- Experience – we invented this technology
- Original patent pending, tested, and proven-effective system
- Staff of experienced, degreed engineers
- Engineering – systems are designed site-specific
- Detailed site surveys
- Ongoing support – site visits and follow up safety checks

LIGHTNING MASTER VS. THE COMPETITION

THE COMPETITION

- Knock-off products – attempts at replication that do not work
- Inexperienced installation by untrained crews who have no vested interest in the system working, but only in finishing the job
- Lack of engineering experience to understand the principles that make the system work
- Insufficient or no attention given to secondary effect
- Improper or no bonding
- Incorrectly specified and sized materials – lack of engineered system design
- Disregard of best practices for lightning protection
- Lack of knowledge or disregard for oil and gas industry standards on lightning protection

Industry Leaders

Lightning Master Principals serve as members of the National Fire Protection Association NFPA 780, Committee on Lightning Protection, the American Petroleum Institute API 545, committee on lightning protection for hydrocarbon storage tanks. They also served as principal members of NFPA 781, Committee on Lightning Protection using Early Streamer Emitting (ESE) Air terminals and the Institute of Electrical and Electronics Engineers IEEE 1576, committee on lightning protection using charge transfer (static dissipation) systems.
