

PIPE CLEANER™ LM-PC-4-24V

LightningMaster
Corporation

Lightning Master Pipe Cleaners are dual-circuit in-line, multi stage, parallel devices designed to protect 4-20mA data and 5V, 24V, 110V/120V control wires in process control applications. Designed to stop transients before they reach the device under protection, these units can be used in DC data and AC control applications. They are designed to be installed in series with your existing conduit wiring, The LM-PC fits standard 3/4 inch metal conduit.

This product compliments the TS-12 Series.

Surge Rating	10kA(8X20 waveform)
Type Designation	Automatic Recovery
Fast Response	<5nS
Series Impedance	<1 Ohm
Standard Voltages	5, 24, 110/120 VDC
Operating Temperature	-20C to +85C
Design Features	Easy installation, 4 wire capability, all wire protected, grounded through conduit, environment resistant enclosure.
